

Parse JSON

The screenshot shows a YouTube video player with a dark theme. The video content displays a Visual Studio Code window with a Python script named `test.py` and its execution output in the terminal.

Python Script (`test.py`):

```
1 import requests
2 import json
3
4 response = requests.get('https://jsonplaceholder.typicode.com/users/1/todos/')
5
6 response_json = json.loads(response.text)
7
8 for todo in response_json:
9     if todo['id'] == 5:
10         print(todo['title'])
```

Terminal Output:

```
PS C:\Users\Brandon\Documents\Python Test> py .\test.py
({'userId': 1, 'id': 1, 'title': 'delectus aut autem', 'completed': False})
PS C:\Users\Brandon\Documents\Python Test> py .\test.py
({'userId': 3, 'id': 2, 'title': 'quis ut nam facilis et officia qui', 'completed': False})
PS C:\Users\Brandon\Documents\Python Test> py .\test.py
laboriosam mollitia et enim quasi adipisci quia provident illum
PS C:\Users\Brandon\Documents\Python Test>
```
